RE: Mountain Line MOAB

60% Estimate Notes (Revised)

We have updated our construction estimate using Wendel's 60% plan set. Our updated estimate totals \$45,790,718. We have attached an estimate breakdown by trade for your review. We are also providing a rough order of magnitude breakdown between the sitework and buildings:

Site development	\$7,565,364.00
Building infrastructure	\$6,103,219.00
Administration / Maintenance Building	\$17,976,915.00
Service Lane Building	\$2,409,549.00
Bus Storage Building	\$11,735,671.00

Below are some notes and significant scope changes from our 30% estimate. These items are highlighted on the attached estimate breakdown. Scopes of work that are not listed below are generally the same as what was described in our 30% estimate. There are minor variations in costs (both up and down) across the board in all of our estimates.

- We have not included costs for off-site infrastructure in this estimate.
- Our estimate for excavation / paving / utilities has increased due to:
  - o increased asphalt paving prices
  - o added trench drains at overhead doors
- We have included costs to infill the existing Grant Creek channel using the stockpiled materials. This cost was not included in our 30% estimate.
- We have not included costs to remove any surplus soils from the site after completion of the mass grading. This will need to be coordinated with the final grading design.

- Our estimate for fencing and vehicle gates has increased due to:
  - o Approximately 300' of additional fencing
  - o 1 additional vehicle gate
  - o The inclusion of high security fencing at the staff parking lot
- We have included a \$750,000 allowance for irrigation, landscaping, and site amenities.
- We have included costs for over-excavation and importing approximately 9,300 cy of structural fill at the building foundations and slabs. This was not included in the 30% estimate. The amount of over-excavation may change with the final site grading design.
- We have increased our material costs for the insulated metal siding package based on some recent pricing increases in the market.
- Our building specialties and equipment package includes:
  - Division 10 specialties
  - o Operable partition
  - o Sun screens
  - o Roof equipment screen
  - Window shades
  - o OFCI equipment
- We have included an estimate for the relocated vehicle wash system based on the 5/8/25 quote from American Truck Wash. We are not sure if this is ultimately going to be included with the construction scope, or if it will be contracted directly by the owner.
- We have included a package for overhead cranes, hoists, and fall protection based on some input from the regional Gorbel representative.
- We have increased our estimate for the geothermal wells and piping, and have included costs for 6 wells (2 extraction wells and 4 injection wells). Our 30% estimate assumed 1 extraction well and 1 injection well.
- Our mechanical and plumbing estimate is reasonably in line with our previous estimate, but we have gotten some feedback on a few items that we will want to monitor as design progresses:
  - The mechanical equipment package totals \$2.1 million. We want to ensure this package allows for competitive vendor bids and or-equal manufacturers.
  - Our estimate includes a \$500k mechanical control package

- Our estimate includes a \$150k package for destratification fans and controls in the Bus Storage building.
- We have increased our estimate for the fluid management system based on vendor feedback. We are continuing to review this design and scope.
- Our electrical estimate did not achieve the cost savings targeted for eliminating the medium voltage service. This resulted in an actual reduction of \$1.4 million.
- We have increased our Division 27 / 28 special systems estimate. We are seeing some significant increases in scope and devices for the camera and access control systems from the 30% design. We have also included a public address system that was not accounted for in our 30% estimate.
- We have not included any costs for the Solar / PV system in this estimate.
- We have reduced our Construction Manager's contingency to 5.5%.
- We are continuing to carry a price escalation allowance of 4.6%.

Scope of Work Quantity

Scope of Work	Qu	Quantity		
General Conditions	26.0	months	\$ 1,261,000.00	
Performance / payment bond (CM only)	1.0	lump sum	\$ 461,000.00	
Electronic equipment and software	0.55%		\$ 245,000.00
